Professional Summary

I am an experienced front-end developer with a strong focus on HTML/CSS framework design, design system implementation, and automation tooling. Active in the open-source and hacklab communities since the early 2000s, I keep myself updated, attending or contributing frequently in Web Events. I have worked in several companies, and I am used to working in big teams, on large and complex stacks. I can combine technical rigor and keeping deadlines. As a very empathetic human, I have a strong team spirit, and my workmates often end up becoming my friends!

Core Skills

- Design Systems (ITCSS, Atomic Design, OOCSS, InuitCSS)
- Framework Design Building & Documentation Automation / automatic styleguide
- Front-End Development (HTML5, CSS3, SASS, React, ECMAScript JavaScript, jQuery)
- Fluent in French and English
